🔗 Shoaib Hamza

SUMMARY

- Frontend developer with over 3 years of experience working with Reactjs, Typescript, Nextjs and other technologies. Proficient in utilizing industry-standard tools such as Git, Jira, Miro, and Slack to streamline development processes.
- Proficient in managing extensive codebases across various projects, ensuring scalability, maintainability, and adherence to coding best practices.
- Hands-on experience with backend technologies, including Node.js and Python Flask.

EXPERIENCE

Frontend Developer   📅 May 2020 - March 2021 (Intern), March 2021 - Present
**BITCS**

- Working in Frontend with ReactJS, NextJS, React-Query, Context, Redux and various other Frontend libraries.
- Led and mentored a team of three junior developers to successfully develop the newer frontend for Codersera utilizing Next.js and implemented a blog platform using Ghost Content API. The website manages upto 2 millions of users weekly.
- Contributed to the development of the backend infrastructure using Node.js for Changa, a platform with 20,000 active daily users. Additionally, spearheaded the development of the frontend for the Changa website.

Frontend Developer   📅 November 2019 - May 2020
StepUp Analytics

- Collaborated on both frontend and backend development using React.js and Node.js to create the StepUp Analytics EdTech website, which boasted several hundred active users daily.
- Collaborated with a team of three developers to create a website facilitating course purchases for students. Implemented Stripe for seamless payment integration.

TECH Stack

Reactjs   Nextjs   Typescript   Javascript   Nodejs   Redux   React-Query   PostgreSQL   Redis

HTML   CSS   TailwindCSS   Git   Playwright   Jest   Webpack/Vite   Docker   Lighthouse

Projects

Portfolio   ⌗ https://github.com/shoaibh/Portfolio   💻 Live
- My Personal Portfolio showing the projects and experience I have.
- Made with NextJS 14, Three.js, Typescript, TailwindCSS, Framer Motion, Resend, and more. The Starry background was created with Three.js

Streamify   ⌗ https://github.com/shoaibh/streamify   💻 Live
- A Data Dashboard for users to check which artist got the most streams in a period of time. User can analyse using different graphs and table.
- Worked with Reactjs (Vite), Typescript, TailwindCSS, recharts, react-date-picker, Shadcn, and other technologies.
- Data created with fakerjs and the backend is created using vercel serverless technology.

Musicroom   ⓞ https://github.com/Musicroom-s   ▭ Project Demo

- A website where different users can login, create and join different rooms. Users can chat with each other and listen to music. Only the owner of the room can play the music but anyone can add it to the queue.
- Worked with Nextjs 13, Typescript, Next-Auth, Nodejs, MongoDB, websockets, Redis and other related technologies.

EDUCATION

Bachelor of Technology in Computer Science   📅 August 2017 - July 2021

Netaji Subhas University of Technology, East Campus, Delhi
